G GymFlow

PROTOTYPE · DEMO & PRESENTATION PACK

The gym desk, a printed QR, and no member logins.

A multi-tenant gym system for independent clubs. Super Admin controls gym owners. Owners add members. Members scan the door QR with the phone camera, check in, see days left, and pay to renew.

Bakau Powerhouse demo · amounts in GMD · October 2026

THE PRODUCT

Three roles. One wall between gyms.

SUPER ADMIN

Platform

Onboards gym owners, approves or suspends gyms, and watches platform invoices. Never opens a member roster.

GYM OWNER

The desk

Creates the gym, adds members by name and phone, prints one QR, checks people in, and activates payments.

MEMBER

No account

Once the desk adds them, they exist. They scan the printed QR. No app, no password, no typed URL.

Simple on purpose. Later modules — staff apps, live payments, classes — can attach without mixing tenants.

USER FLOW

Six moves from empty gym to a check-in at the door.

01
Owner signs up
Gym name, email, password. Members cannot self-register.

02
Admin approves
Super Admin sees gyms, not member phones.

03
Desk adds people
Name, phone, plan. They are in immediately.

04
Print one QR
One code for the gym, taped at the entrance.

05
Member scans
Camera opens check-in, days left, Pay to renew.

06
Desk activates
Pending renewal becomes paid. Due date moves.

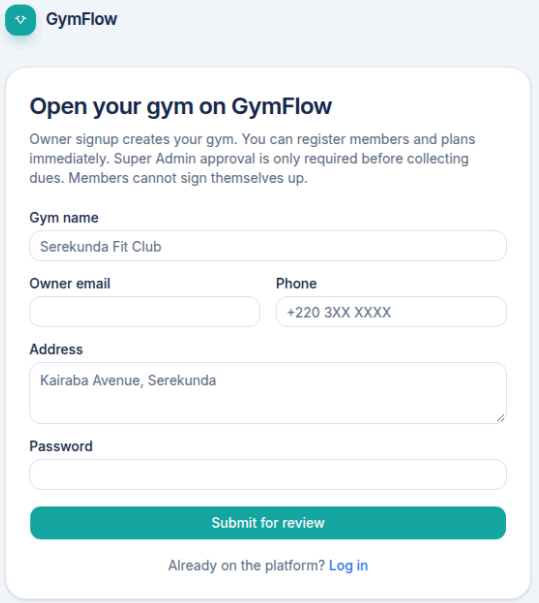

Walk these screens live. Seeded password is **gymflow-demo**.

Step 01

Gym owner creates an account

Say this. A gym owner signs up. Members are not invited to create logins.

- Public page at /signup
- Gym is created so the desk can add people
- Super Admin still reviews the tenant

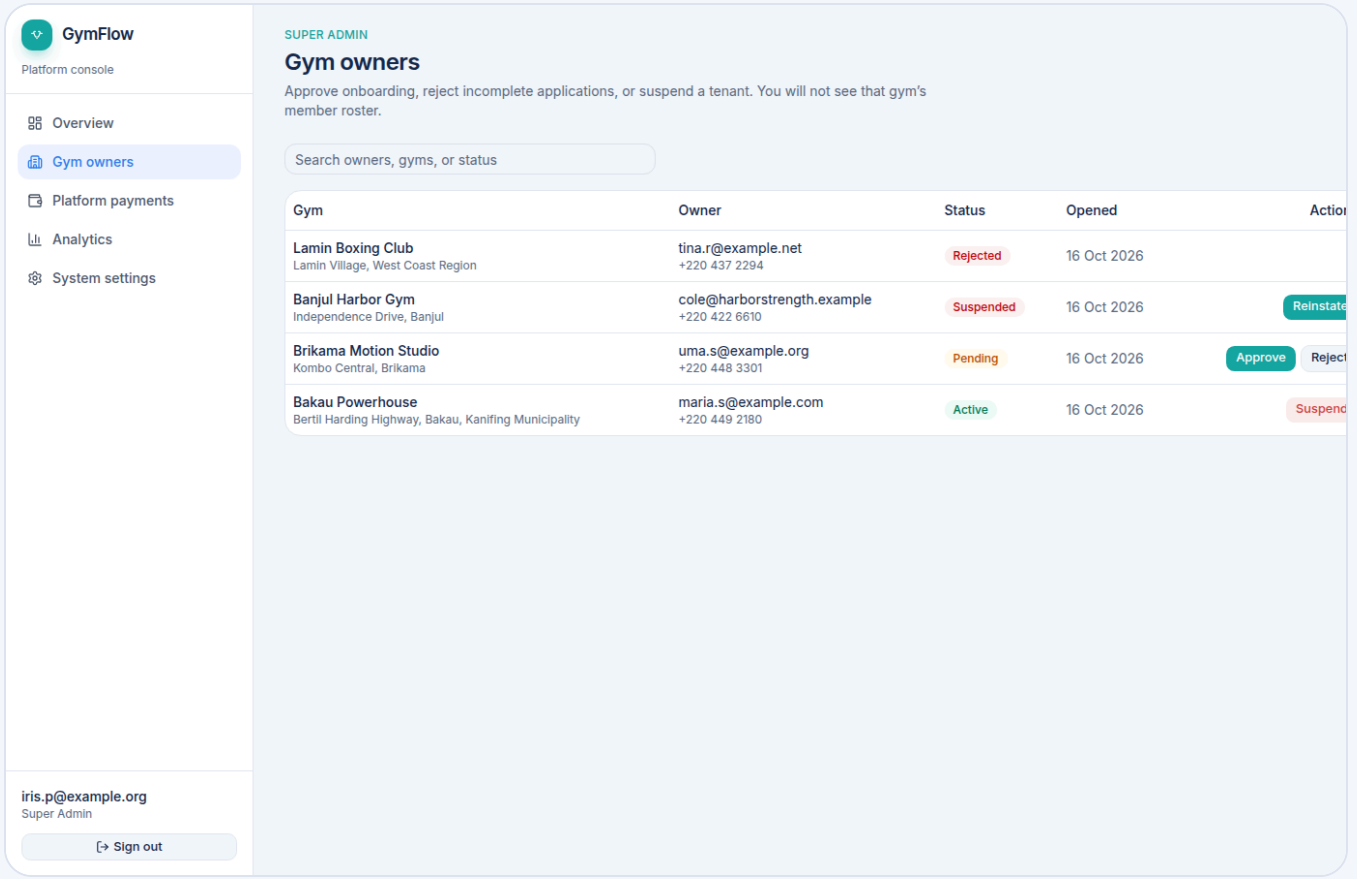

Step 02

Super Admin approves the gym

Say this. The platform operator sees gyms, not member files.

- iris.p@example.org
- Approve, reject, or suspend
- No member PII on this screen

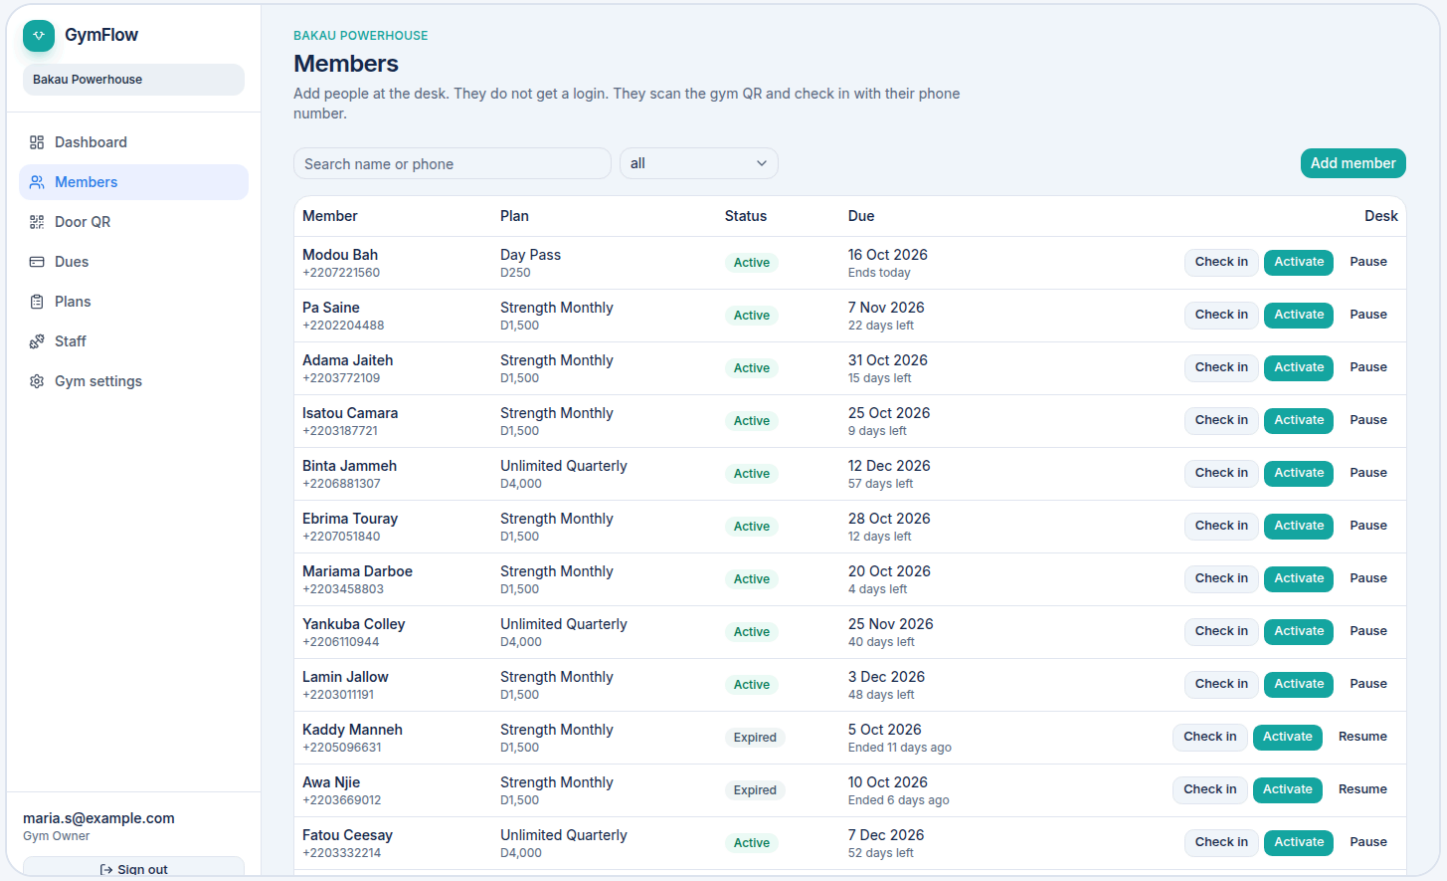

Step 03

The desk adds members

Say this. Name, phone, plan. They are on the roster with no password.

- Plan, due date, days left
- Desk Check in
- Activate payment by hand
- Pause / resume

Step 04

Print one door QR

Say this. One code for the gym. Members use the phone camera — no app, no typed URL.

- Owner → Door QR → Print
- On a real floor, open GymFlow with the LAN IP before printing

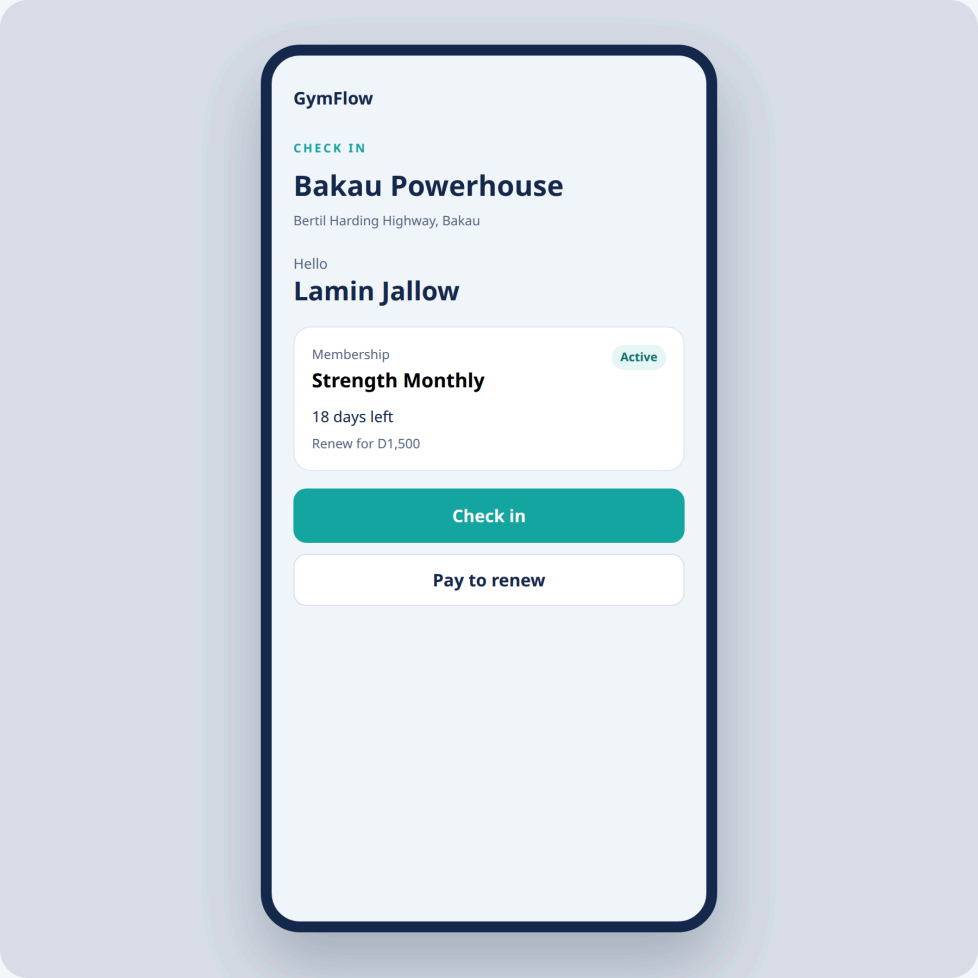

Step 05

Scan, see days left, check in

Say this. The camera opens this page. They type the phone the desk saved.

- Demo phone **301 1191** — Lamin Jallow
- Membership type + days left
- Check in
- Pay to renew

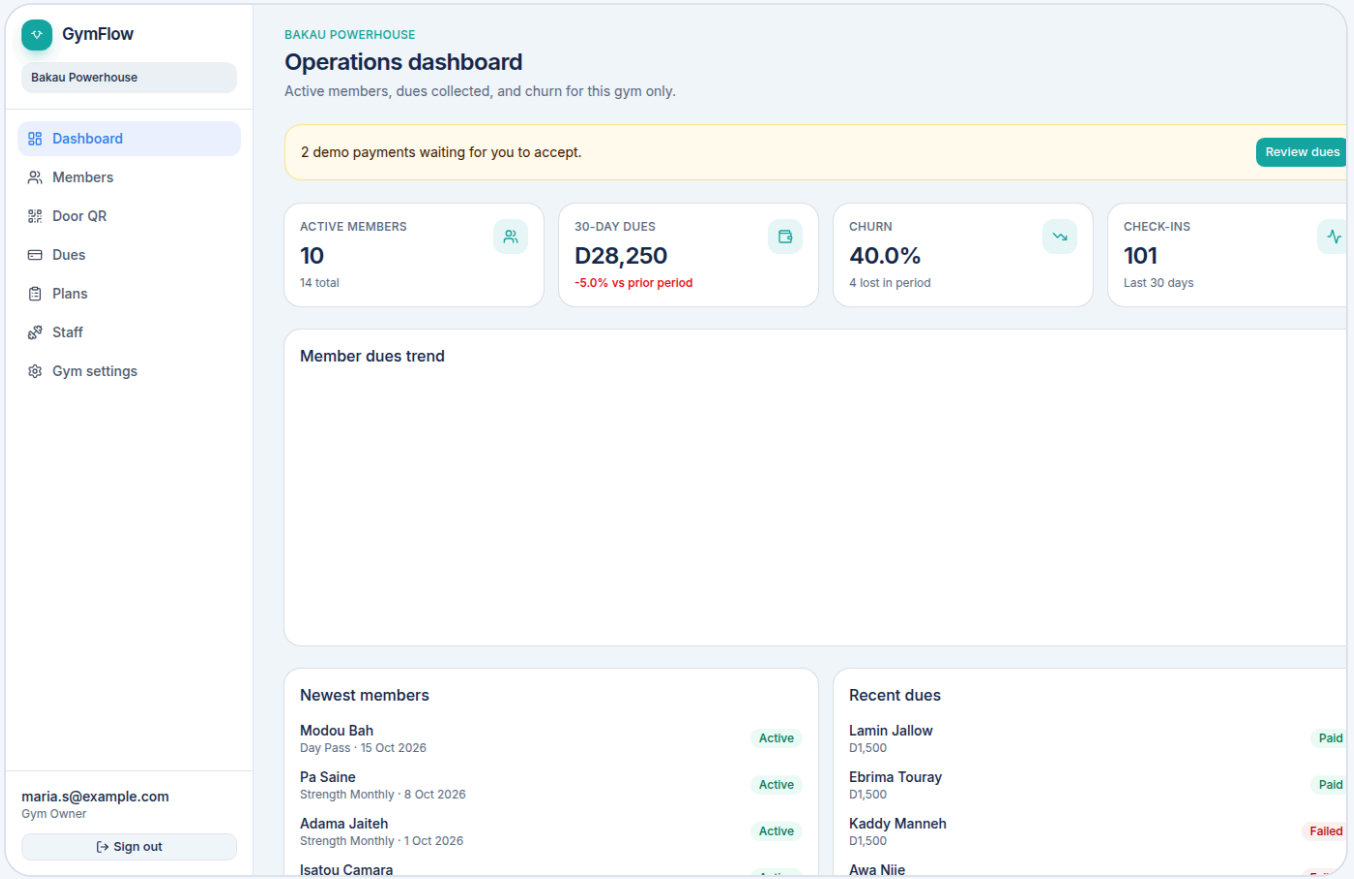

Step 06

Pay to renew, activate at the desk

Say this. Pay to renew sends a pending payment. The owner taps Activate when cash or Wave is collected.

- No live card processor in this prototype
- Activate extends the membership due date
- Owner Dues list also shows the pending item

LIVE DEMO

Accounts on this prototype

Password for every seeded account: **gymflow-demo**

WHO	HOW TO ENTER	WHAT TO SHOW
Super Admin	iris.p@example.org	Gym owners — approve / suspend
Gym owner	maria.s@example.com	Members, Door QR, Dues, Activate
Pending owner	uma.s@example.org	Waiting on Super Admin
Member	No login · /g/demo-bakau-powerhouse	Phone 301 1191 · Lamin Jallow

On your PC: stop the old server, then **git pull** · **npm run db:setup** · **npm run dev** → http://127.0.0.1:43127

WHAT'S NEXT

Simple on purpose.
Ready for the next module.

Now

Super Admin, gym owners, desk members, one door QR, check-in, demo renewals in GMD.

Later, without a rewrite

Staff apps, live Wave or card payments, classes, reports. Tenant walls stay.
